

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the coverage-check form, which is the primary qualification step for every plan. The funnel is bleeding value because the homepage and plans pages present multiple competing CTAs and duplicate forms, diluting user focus and creating ambiguity about the primary conversion path, while the page's heavy script load and slow LCP (48.9s) cause most visitors to bounce before they even reach the form.

#	Finding	Severity	Effort	PXL
1	Lab LCP 48.9s on mobile The page's main content takes 48.9 seconds to appear on a mid-range phone, causing most visitors to bounce...	Urgent	Medium	5/10
2	Competing CTAs split funnel Multiple competing CTAs on the homepage create ambiguity about the primary conversion path, diluting user...	High	Medium	5/10
3	Unclear what is sold The homepage headline promises internet that works anywhere but never states what the product actually is (a...	High	Low	5/10
4	Lab CLS 0.73 on mobile The layout jumps while loading, causing mis-taps on the very buttons the funnel depends on.	High	Medium	5/10
5	Lab TBT 1780ms on mobile Script work freezes the main thread, so taps and scrolls go dead during load.	High	Medium	5/10
6	Heavy third-party script load The homepage loads 65 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
7	Benefit claims lack specifics The copy repeatedly says the internet is fast and reliable but does not state concrete advantages over...	Medium	Low	5/10
8	Duplicate pricing creates confusion The plans pages show the same price points repeated as both monthly and one-time fees, making it hard for...	High	Low	4/10

#	Finding	Severity	Effort	PXL
9	Duplicate forms create redundant steps Two separate coverage-check forms with identical CONTINUE buttons on the same page force users to choose...	Medium	Low	4/10
10	Guarantee and return policy unstated No page digest text mentions a money-back guarantee, return window, or satisfaction promise, despite the site...	Medium	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
